Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 23 April 2004.  
2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.  
3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## DETAILED ACTION

### *Priority*

1. Acknowledgment is made of applicant's claim for foreign priority based on an application filed in Finland on May 23, 2001. It is noted, however, that applicant has not filed a certified copy of the Finish application as required by 35 U.S.C. 119(b).

### *Claim Rejections - 35 USC § 103*

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

3. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later

Art Unit: 1731

invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

4. Claims 1-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Suzuki et al., US Patent No. 4,298,652, hereafter US'652, or Suzuki et al., GB 2047568, hereafter GB'568 or Boone, WO 00/34584, hereafter WO'584.

Regarding claims 1-3, all of the above patents teach coated papers having mechanical pulp content within the claimed range, see US'652, abstract and column 4, lines 1-19; GB'568 abstract; and WO'584 page 13, lines 10-12. They teach also opacity and brightness falling within the claimed range, see US'652 column 3, lines 64-68; GB'568 examples and WO'584, page 13, line 31 through page 14, line 6. None of the references quantify the surface roughness or smoothness of the sheet; however, this seems to be inherent to the reference or at least a recognizable optimization variable, i.e., optimization of a result effective variable such as the smoothness of a paper is within the level of one of ordinary skill in the art, absent a showing of unexpected results.

Regarding claim 4 all of the above patents teach the use of TMP, US'652, column 3, lines 16-27; GB'568 page 2, lines 23-27; WO'584, page 1, lines 17-23. Regarding claim 5, US'652 and GB'568 teach the screening of the pulps to obtain desired ranges, see US'652 column 3, lines 38-68; GB'568 page 2, lines 23-63 and therefore, the optimization of the fiber fractions is within the levels of ordinary skill in the art, absent a showing of unexpected results.

***Conclusion***

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure in the art of "coated papers including at least 90% of mechanical pulp."
